

English Kindergarten Evaluation

Standards and Procedures

5 Areas of Development and Competencies:

1. Physical and Motor Development: Increases physical and motor development
2. Emotional Development: Builds self-awareness
3. Social Development: Maintains harmonious relationships with others
4. Language Development: Communicates using oral and written language in English
5. Cognitive Development: Discovers the world around them

Evaluation is continuous throughout the year (a Progress Report issued on October 12, 2023 followed by 3 Term Report Cards). It is based on the teacher's observations, the students' social interactions and individual and group activities.

In kindergarten, teachers evaluate students in everyday situations for example circle time (calendar), large and small group lessons, story and sharing time, free play, teacher directed and self-directed activities.
